Subject: Deficient Amended Notice of Intention to Commence Large Mining Operations, Lisbon Valley Mining Co LLC, Lisbon Valley Mine, M/037/0088, San Juan County, Utah

Dear Mr. Indergard:

The amendment to the referenced Notice of Intention to Commence Large Mining Operations (NOI) received by the Division of Oil, Gas and Mining on July 9, 2012, is incomplete. The following information is still required:

1. You will be required to complete regrading work on Dump C prior to the Division's approval of this proposal. An inspection of the work will be required.
2. The Bureau of Land Management will have to agree that the regrading work on Dump C has been adequate; please contact the BLM.
3. Please indicate whether the Trust Lands Administration has provided a cultural resources clearance.
4. Revegetation work has not been completed on Dump C, so the Division cannot approve an "acre for acre" exchange of reclamation responsibility. Similar numbers of acres are being proposed for the Dump B expansion and regrading release for Dump C. The Division needs to either receive an increased reclamation surety or would need to release additional acres of reclamation to make up for the revegetation costs of the expansion area.

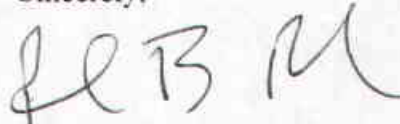

These deficiencies in the application primarily involve release of the reclamation work, so please submit form MR-SITE (available on the Division's web site) when the appropriate reclamation work has been completed. Modifications to the NOI should be submitted using form MR-REV-SMO/EXP which is also available on the Division's web site.
